HELP PREVENT THE SPREAD OF

COVID-19
Coronavirus

**KEEP YOUR WORKPLACE
HEALTHY & SAFE!**

As the severity of the Coronavirus pandemic increases, we understand the questions and concerns employers are facing from employees and customers. **Proactive employers are taking precautionary measures to ensure the safety of those entering their place of business.** As the local leader in janitorial services for over 25 years, the health and safety of our customers and community is the heart of our business and the first priority in everything we do each day.

How COVID-19 Spreads

The CDC reports:

Spread from person-to-person happens most frequently among close contacts through respiratory droplets

Current evidence suggests that novel coronavirus may remain viable for hours to days on surfaces made from a variety of materials.

Cleaning of visibly dirty surfaces followed by disinfection is a best practice measure for prevention of COVID-19

How Duncan's Can Help

Professional Disinfectant Fogging

- Our fogging service atomizes the hydrogen peroxide based disinfectant cleaning solution we use.
- The fogger creates fine particles of the disinfectant that become suspended in the air and also lands on surfaces that normal cleaning would not reach.
- You are effectively disinfecting areas in your building during this process that normal spray and wipe procedures can't get along with areas that cannot be over-wetted.
- The disinfectant remains on the hard surfaces and dries creating a longer kill time to combat bacteria and viruses.
- The hospital grade hydrogen peroxide based disinfectant agent used is completely safe and EPA approved.

**BE PREPARED. Keep your workplace a safe place to work.
